RE: Invention Report 2541 "The Design of an Internet-Based Immersive 3-D Digital Orthopedics Learning Environment Using Augmented Reality"

Dr. Shabo,

Thank you for submitting the above-referenced Invention Report to the Intellectual Property Committee (IPC) for consideration.

The Committee has made the following determinations and recommendations with regard to your submission:

1. that the University has a legal ownership interest;
2. that Yves NKULU-ILY Shabo is the originator(s) as disclosed; and
3. that the Office of Technology Commercialization (OTC) should investigate appropriate protection for the intellectual property on behalf of the University of Kentucky Research Foundation (UKRF).

As a next step, OTC will work with you to determine protection and the appropriate commercial pathway. These endeavors present significant challenges and your continuing cooperation will be crucial to their success. For more information related to UKRF's license income sharing and related IP policies, please visit [University Administrative Regulation 7:6](#).

On behalf of the Committee, thank you for the outstanding academic work that led to this development.

Yours truly,

Robert Lodder

Intellectual Property Committee
